CLAIMS

1. A lighting system comprising:
 - a carrier for a primary source of electricity, including a plurality of primary coils;
 - a plurality of sealed lighting modules, each including
 - at least one secondary coil, each for electro-magnetically linking with one of the primary coils; and
 - at least one light source.
2. A lighting system as claimed in claim 1, wherein each lighting module further includes battery back-up.
3. A lighting system as claimed in claim 2, wherein each lighting module further includes charging circuitry for charging the battery
4. A lighting system as claimed in claim 2 or claim 3, wherein each lighting module further include change over circuitry to change to battery power in the event of mains failure.
5. A lighting system as claimed any preceding claim, wherein each lighting module further includes rectification means.
6. A lighting system as claimed in any preceding claim, wherein the light source is at least one LED.
7. A lighting system as claimed in any preceding claim, wherein the light sources form shapes.
8. A lighting system as claimed in claim 7, wherein the shapes are directional arrows.
9. A lighting system as claimed in claim 7, wherein the shapes are pictograms.
10. A lighting system as claimed in claim 7, wherein the shapes are words.
11. A lighting system substantially as hereinbefore described with reference Figures 1 to 4 of the accompanying drawings.
12. A sealed lighting module for use with a carrier for a primary source of electricity, and having a plurality of primary coils, the lighting module comprising:
 - a least one secondary coil for electromagnetic induction from a primary coil; and

WO 03/081745

9

PCT/GB03/00837

- at least one light source.

13. A sealed lighting unit as claimed in claim 12, wherein each lighting module further includes battery back-up.
14. A sealed lighting unit as claimed in claim 13, wherein each lighting module further includes charging circuitry for charging the battery
- 5 15. A sealed lighting unit as claimed in claim 13 or claim 14, wherein each lighting module further include change over circuitry to change to battery power in the event of mains failure.
16. A sealed lighting unit as claimed any one of claims 12 to 15, wherein each lighting module further includes rectification means.
- 10 17. A sealed lighting unit as claimed in any one of claims 12 to 16, wherein the light source is at least one LED.
18. A sealed lighting unit as claimed in any one of claims 12 to 17, wherein the light sources form shapes.
- 15 19. A sealed lighting unit as claimed in claim 18, wherein the shapes are directional arrows.
20. A sealed lighting unit as claimed in claim 18, wherein the shapes are pictograms.
21. A sealed lighting unit as claimed in claim 18, wherein the shapes are words.
- 20 22. A sealed lighting unit substantially as hereinbefore described with reference Figures 1 to 4 of the accompanying drawings.
